Summary

Backend Software Engineer experienced in internal platforms, REST APIs, automation systems, and cloud-based services using **Node.js, TypeScript, Python, Django, React, and AWS**. Skilled in scalable backend services, workflow automation, containerization, CI/CD support, and production-focused system design.

Core Skills

Primary Stack	Node.js, TypeScript, Python, Django, React, AWS
Backend Engineering	Node.js, Django, DRF, FastAPI, REST APIs, microservices, workflow automation
Frontend	React, TypeScript, JavaScript, dashboard development, component-based UI
Cloud & DevOps	AWS, Docker, CI/CD support, deployment automation, Cloudflare, shell scripting
Databases & Data	SQL, NoSQL, PostgreSQL, DynamoDB, Redis, Vector DB, Pandas, Prisma
Integrations & Tools	Selenium, GraphQL, tRPC, Git, Jira, Google Apps Script, third-party APIs, LLMs

Experience

Software Engineer <i>Ninja Digital Innovations (Brandcloud BD Branch)</i>	<i>Dhaka, Bangladesh</i> <i>June 2025 – Present</i>
- Build internal platforms using Node.js, TypeScript, Python, Django, and React, delivering scalable backend services and web applications. - Design REST APIs, service workflows, and integration layers for automation, internal tooling, and developer productivity. - Improve reliability through cloud workflows, containerization, and automation using AWS, Docker, Cloudflare, and Selenium.	
Software Engineer <i>Brandcloud, Inc.</i>	<i>Tokyo, Japan</i> <i>April 2023 – May 2025</i>
- Built internal tools and automation platforms with Node.js, TypeScript, Python, Django, and React, improving delivery speed. - Developed backend services and RESTful APIs for internal workflows, data processing, and business applications. - Contributed through code reviews, workflow improvements, mentoring, backend development, automation, and maintainable delivery.	

Projects

CMS System
- Built a CMS and admin platform for content, media, recruitment, and publishing workflows used by internal teams. - Implemented SEO controls, preview/publishing pipelines, and secure role-based access. Stack: TypeScript, Node.js, tRPC, Cloudflare, Python(Script), Shell, Git
RAG System
- Built a retrieval-augmented generation system for document ingestion, semantic search, context retrieval, and LLM-based answers. - Implemented embeddings, vector storage, caching, chat/query APIs, and PostgreSQL-backed metadata workflows. Stack: Python, TypeScript, tRPC, Vector DB, LLM, Quad Cache, Redis, PostgreSQL, Docker, Git
Network Management System
- Developed a monitoring platform for large-scale network checks across Ping, DNS, SNMP, and Traceroute workflows. - Built Azure AD SSO, CSV export, service communication workflows, and a React dashboard for real-time visibility. Stack: Python, Node.js, React, AWS, Docker, Shell, Git
Competitors Ads Analysis AI
- Built an AI-assisted analytics platform to collect competitor ad data, classify campaigns, and surface spend trends. - Owned backend workflows, automation pipelines, and dashboards for reliable processing and business insights. Stack: Python, Node.js, React, Selenium, GraphQL, Prisma, Pandas
Document Processor
- Delivered a backend document workflow system for PDF upload, splitting, merging, and bulk processing. - Improved reliability through Docker deployment, structured logging, and timezone-aware processing. Stack: TypeScript, Node.js, Python, Django, Docker, AWS, Git
Jira Automation
- Automated Jira issue creation, updates, sprint assignment, and formatting from Google Sheets using API integrations. - Reduced coordination overhead with AI-assisted translation and Markdown-to-Jira conversion. Stack: Google Apps Script, Jira API, Gemini AI, Git

Education

Daffodil International University <i>B.S. in Computer Science and Engineering</i> GPA: 3.76/4.00	<i>Dhaka, Bangladesh</i> <i>2018–2022</i>
